

**Help us shape the future of children's heart services in your
area**

A review of children's heart surgery services in England is currently taking place to ensure children and young people receive the very best care possible. A likely outcome of the review is fewer surgical centres with larger teams of experts. How should surgical and cardiology services be organised in your area?

If your child has a heart condition, you work in children's cardiac care or you have an interest in this subject, we'd like you to come to an event and have your say on the future development of the national service.
